

SAMPLE APP AND FORMATTING

Evolution

\$1.99

Description of the app goes here: Include a summary of the app, what it is supposed to help you do and what features does it have (what is it that makes this app interesting?)

Guidelines for the App:

The app that you design will be “uploaded” into the App store and you will present your app to the scientists on an 8 ½ x 11 piece of construction or computer paper. The final App must include the following:

- Icon
- Title
- Price
- Description of the app (at least 3, no more than 5 sentences)
- Screenshot of the app – this is the MOST IMPORTANT of your project. It MUST include a drawing or picture of the species you chose (and the name of the species), the function table and the equation created to solve the function table so the scientists can calculate the rate of mutation.

Species Selection/Function Calculator

X	Y
5	10
100	200

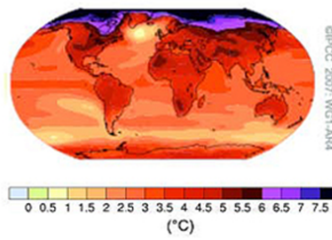

X = Number of Mutations
Y = Time in Years

Equation: $y = 2x$

Environmental Factors Selection

Sea level Rise

Warming Oceans

Volcanic Eruption

Results Page

Based on your selection of the _____ species, and your view into the future of _____ years, there is a good chance that these organisms would have developed _____ in order to adapt to the _____.
